

Requirements After Acceptance into the Radiography Program

The following requirements must be completed **after acceptance but prior to beginning the first semester of the program**:

1. CastleBranch drug screening
2. CastleBranch background check
3. Four hours of observation at one of the designated clinical settings
4. Read the Radiography Program Academic Requirements and Essential Functions document, then sign and return the signature page

To comply with our clinical site contracts, the following requirements must be completed **before the start of the second semester**:

1. American Heart Association (AHA) Basic Life Support (BLS) CPR for Healthcare Professionals certification*
2. Physical health examination for Health Occupation Programs*
3. Immunization screening history*
4. Annual TB test*
5. Annual influenza vaccination*
6. MRI safety training
7. Vital signs training
8. HIPAA training

*Due to the demanding schedule during the first semester, it is strongly recommended that students complete the AHA BLS CPR certification, the physical examination, immunization screening history, and annual TB test before spring classes begin.
